

AIR COMPRESSOR OIL LEVEL GAUGE

7483S*****

APPLICATION

The 7483 series gauges are widely used to indicate oil levels of air compressors.

The size of the stem and float is designed to encounter each tank dimensions or specifications.

The dial design allows the possibility of side or front view.

The 7483 series gauges are intended for use under pressure of 25bars and temperature up to 120°C.

STANDARD MATERIAL OF CONSTRUCTION

Head : Brass 3/4" BSPT PN25

Dial: Plastic

Support Tube : Aluminium

Rod Shaft : Aluminium

Float : Aluminium

Magnet : AlNiCo

Bearing : Stainless Steel

Stop Adapter : Brass

REMARK

Head has been tested up to 50 bar g

Float collapse pressure is 125 bar g

ORDERING INFORMATION

As this gauge could be adapted to any tank model, tank drawing is required.
Stem and float length can be calculated for each application.

In addition, float rod could be bended as necessary
